[Frontend and Backend Timeouts)

* Timeouts are of various types
  at each layer of system

```
┌─────────┐          ┌─────────┐
│ client  │ <──────> │ server  │
└─────────┘     │    └─────────┘
                │
                ▼
             Timeout
```

* Let say we add 1 layer

```
┌────────┐      ┌───┐      ┌────────┐
│ Client │ <──> │ G │ <──> │ Server │
└────────┘  │   │ a │  │   └────────┘
            │   │ t │  │
            │   │ e │  │
            │   │ w │  │
            ▼   │ a │  ▼
        Timeout │ y │ Timeout
                └───┘
```
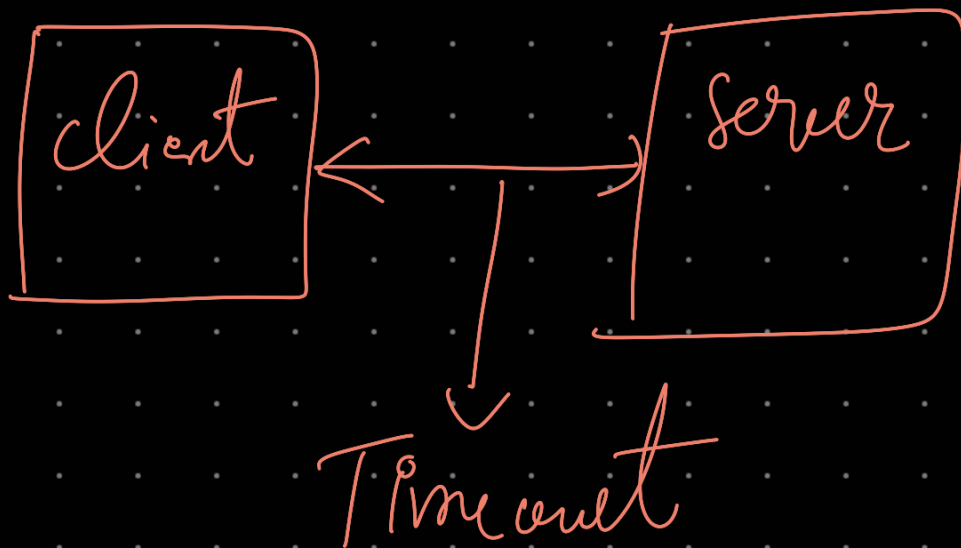

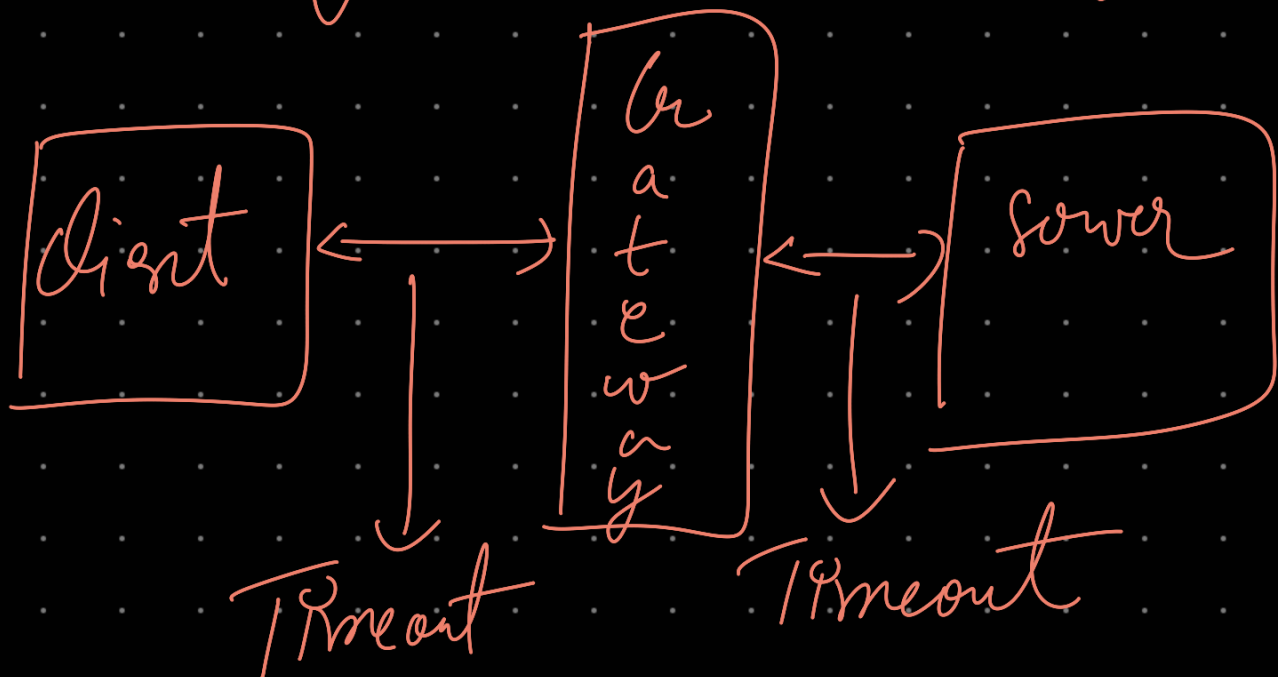

and so on.

[Most common Timeouts]

1. Connection Timeout
   ↳ could be at client or server

2. Request Read timeout
   ↳ Mainly at server

3. Wait Timeout

4. Usage Timeout

5. Response Timeout
